

PBX/VoIP Telecom Compatibility Matrix

Seamless Communications Group specializes in the development and integration of physical security solutions. We concentrate on providing seamlessly integrated security enhancements and solutions available only through SCG. Our patented applications provide comprehensive, yet simple network solutions to even the largest of integrated Call, Voicemail & Call Center systems.

The following is a list of compatible platforms. If your platform is not listed, don't hesitate to call us. We will simply expand this list to include your platform as we are capable of integrating into just about any TELCOM system.
