

"Improving UC integration from Customer to Setup"
"Improving the way Security Responds - Protects - Informs"

SCG Capabilities

| | |
|-------------------------------|--|
| Unified Communications | SCG UC Productivity Tools© significantly reduce errors, save time & money SUNY Cortland, NFCU, Canandaigua SD, LeRoy CSD, AO US Courts scgconnect.com/UC , USCO TX-8-401-476 |
| IT | Professional services for Cisco Enterprise Unified Communications (UC) Call manager (CM) and Cisco Unity Connection (CUC). L2 - L3 switch or router in MDF or IDF with full racking capabilities |
| Network | Installation and setup, network infrastructure (cabling, fiber, racks, end point connection and termination). L1 from copper, fiber or wireless |
| Assesment | Full or partial building systems Physical Security assessments |
| Physical Security | Integrated Physical Security Management Suite® integration of electronically controlled egress devices and sensors addressing TSA and DHS directives. Integrates five critical elements of emergency management - First Alert, Physical Control, Sensors, Notification and Incident Report Everything seamlessly integrated working together for you. scgconnect.com/PSMS US Patents 0107258 A1, 8191507 B2 |

IT - Network - Unified Communications:

Simultaneous group access: Team members including site personnel easily access information anytime of day

Save time: Our hub makes day one a streamlined process, with minimal error rates & reduced resolution/fix times.

Simplified interface: Site personnel can easily add or update information for phone device, user updates, voice mail

Structured naming convention: Consistent and flexible adhering to Cisco best practices. Enables personnel to quickly zero in on whats needed for faster and easier administration or trouble resolution of multi site - multi organizational implementations

Simplified programming: In one step a single file with direct input into CM, CUC platforms for phone, user updates and voicemail accounts all programmed in minutes not hours or days. Installation labels, reports and more for simplified and easier deployments

Physical Security Management Solutions:

SCG provides patented solutions for organizations requiring enterprise electronic physical security capabilities. this enables integration of existing electronically controlled egress devices and sensors addressing TSA and DHS directives such as portable command and control, force multiplier, improved situational awareness into a seamless control capability. From everyday use to emergency needs.

All aspects integrated into our solution provide:

- Secure: DFARS 252.204-7012 compliant - VPN, SSL
- First Alert: Emergency - Blue Light phones, Sensor(s)
- Physical Control: Doors, Gates, Elevators, Escalators, Lights, Cameras, Sensors...
- Notification: Automated Email, SMS, MMS to Trusted personnel
- Reports: Incident reports of all actions within seconds

Benefits:

- Mobile Command and Control
- Trusted Responders take Immediate Control of the Incident and the perimeter
- Real time Monitoring of 'Trusted Responders' Physical Control Actions Performed
- Instant Automatic Incident Reporting
- Force Multiplier
- Improved Situational Awareness
- Seamlessly integrate existing egress controlled devices, blue light and emergency phones, cameras, and sensors.

SCG is a development and sales partner with Apple, Axis, Bosch, Cisco, Microsoft, XOJO and others
