

Input Integration Capability is Here Today

You have alarm panels that contain sensors and other devices whose functions annunciate alarms to security and other personnel.

These panels perform what you need with the exception that they are not integrated into a physical management solution.

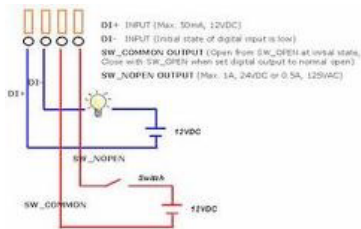

Integrating into a physical management solution enables compliance needs and improved security.

Reducing capital investment, facility construction and device replacement is a desire.

Improving Safety for All

Tools and documentation your security personnel can use to integrate security response needs and requirements.

- Simply integrated
- Automated notification
- Phone line not required
- Instant - Automatic
- 24x7

Secure Solutions Today

Interoperable Input Integration

Bring Security Online with existing infrastructure

- Easily integrate existing alarm and notification panels
- No need to replace existing devices with costly new ones
- Easy to use
- Provides instant communications
- Network connectivity required
- Responds to input(s) automatically
- Ready any time, 24x7
